### Where the vocabulary comes from

All vocabulary in this book was taken from official CELPIP materials, including reading passages, listening tracks, questions, answer options and diagrams. New dialogues, comprehension questions and explanations are original study material: short vocabulary activities, not full-length test simulations.

### Audio and classroom use

The clips use the local Kokoro-82M model with two American English voices at a clear study pace. They support recognition practice but do not reproduce natural timing or the full range of test speech. A teacher can read the transcripts aloud with two speakers. This book does not imply CELPIP endorsement or promise a score.
